Todus

Todus story

Todus brand builds upon a 29-year tradition of quality craftsmanship. We create elegant and comfortable pieces of furniture that enliven every outdoor space. Our mission is to bring our customers sophisticated products that live up to their expectations on every occasion. Be those everyday moments spent in the circle of family and friends or special occasions made to last in their memories.

We manufacture all our products with care in Opava, Czech Republic.

Our designers

Studio Segers is a creative family corporation founded in 1989 in Maaseik, Belgium. Wim and Bob, the representatives of two generations of product designers form a powerful symbiosis of experience and young creative talent. Their work symbolizes a no-nonsense approach where only sensible and down-to-earth concepts find their realization.

Jiří Španihel established his design studio in 1991 and since then developed a close cooperation with a wide variety of leading companies both in the Czech Republic and abroad. He received a number of prestigious awards for his work.

Alexander Gufler founded his design studio in 2010 in the heart of Vienna, from where he collaborates with national and international clients. His work has been exhibited in various countries and honoured with international design awards.

Baza

by Studio Segers

Studio Segers designed a modular system that makes possible endless combinations but with a parts list so short that it is extremely easy and fun to create your own outdoor settings.

The Baza modular sofa is characterized by a combination of powder coated stainless steel frame and very comfortable, soft upholstered cushions.

The sofa consists of two rectangular elements and a square pouf that allows for numerous options. Together with three backrests it is possible to create a sofa which can easily be adapted to suit any situation and optimize any space in which it is placed.

Duct

by Studio Segers

When chairs are set at a table they are mostly viewed from the back that is why Studio Segers focused on the back of the chairs when creating this collection. The Duct armchairs are characteristic for smooth transitions between legs, armrests and back support. The name of the collection derives from architecture in that it refers to viaducts which have a similar structure to the Duct chairs.

The arm and back support of the Duct armchair is made of a smoothly curved casted piece of aluminium combined with a seating part from fabric straps. On the other hand the Round Duct armchair is made of powder coated stainless steel in combination with a comfortable seating cushion.

Condor

by Studio Segers

Condor armchairs have a strong graphic look but at the same time offer a very comfortable seating. Thanks to the transparency of the stainless steel mesh, the tubes of the chair almost resemble a graphic line drawn in the air. The closed back and arm shell really embrace you when seated and evoke a feeling of security and cosiness.

Starling

by Studio Segers

Studio Segers designed a collection that is suitable for every occasion and represents harmony of aesthetic and comfort. Products from this collection are characteristic by precise monolithic lines from bent powder coated stainless steel. All welding as well as smooth connections of mesh to the frame are ingeniously hidden so that they are almost imperceptible. The subtle frame of all the seating items provides for a sense of lightness.

Puro

by Alexander Gufler, Todus

To round off our in-house Puro collection we teamed up with Alexander Gufler, who designed a sleek, comfortable armchair that perfectly complements our popular Puro tables. Tables from this collection are favoured for their discreet elegance and simplicity. They are available in extendable version and made-to-measure sizes.

Puro armchairs (white 110, white Batyline 510), Puro table (white 110, ceramic top in white 210).

Lotos

by Jiří Španihel

When designing the Lotos modular system, Jiří Španihel focused primarily on the seating ergonomics of the product. The result is an outdoor sofa characteristic for its deep seating part that offers outstanding space and comfort.

The Lotos modular sofa consists of square units complemented by back and armrest modules. It can be easily assembled to create a seating that will fit perfectly in any outdoor space.

Leuven

by Todus

The Leuven collection is unfussy and practical with a stylish, architectural silhouette. It consists of a complex and variable set of items that can be placed in different environments.

It is designed for sharing and bringing family, friends and colleagues together around one table.

Materials

We carefully select all materials we use to ensure that our products are not only visually pleasing but also comfortable and functional in order to be used all year round and in all weather conditions.

We also put great emphasis on detail and precision during the manufacturing process so that the end products meet the highest criteria of our customers.

Powder coated aluminium/stainless steel for frames
100% polyester is used for powder coating.

Fabrics for sofas and cushions

Crevin Vita (Category A) is a unique upholstery fabric for joint indoor outdoor use. It has a homely and natural appearance and can be easily cleaned by domestic machine-wash. It is finished with stain repellence.

Fabrics for deco cushions

Crevin Bora Bora(Category B) is a heavy weight and robust fabric that strongly resembles sisal and raffia rugs. It feels like a hand-woven fabric with a crafted, artisanal quality. It can be easily cleaned.

Fabrics for sofas and cushions

Kvadrat Patio (Category B) apart from its excellent technical features, also stands out for its soft touch. It has a subtle structure, which combines two coloured yarns in the warp and one in the weft. It features a fluorocarbon-free, environmentally-focused finish, which is water-repellent and fast-drying.

Fabrics for chairs and sunloungers

Batyline is a technical fabric developed especially for outdoor use. It has exceptional tear strength, UV radiation resistance and dries very quickly.

Ceramic for table tops

Ceramic is a 100% natural product. It does not contain any organic pigments and is thus resistant to UV rays, so it's perfectly colour stable. Ceramic as a material is highly abrasion resistant.
